

# Release 6.1 Upgrade Notes

## End of support of MSSQL 2008

As mentioned in the previous upgrade notes, MSSQL is no longer supported ( [↑ SONAR-7893](#) - End of support of MSSQL 2008 CLOSED ).

## Other Noteworthy

- Customisable project dashboards are now fully removed ( [✓ SONAR-7915](#) - Drop project level dashboards CLOSED )
- AJP connector support is also removed ( [↑ SONAR-7989](#) - Remove support of AJP Connector CLOSED )
- For plugin developers: ModuleFileSystem API was dropped ( [✓ SONAR-7864](#) - Drop org.sonar.api.scan.filesystem.ModuleFileSystem from API CLOSED ) so your plugin might not be compatible with SonarQube 6.1 and therefore break all analyses.
