

Release 6.3 Upgrade Notes

API Changes

If you are developing plugins using the Java API or integrating SonarQube with other systems using the Web API, please read the [API Changes](#) page to know if you are impacted by the changes.

Other Noteworthy

- Extensibility of the Web Application is back ( [SONAR-8584](#) - Define new PagesDefinition API to create a new page in a plugin CLOSED). Please read the "[Extending Web Application](#)" documentation.
