

# Branding Plugin

## ⚠️ Deprecated

Deprecated since SonarQube 5.1 because the functionality was replaced by the native SonarQube feature [Look and Feel](#) functionality.

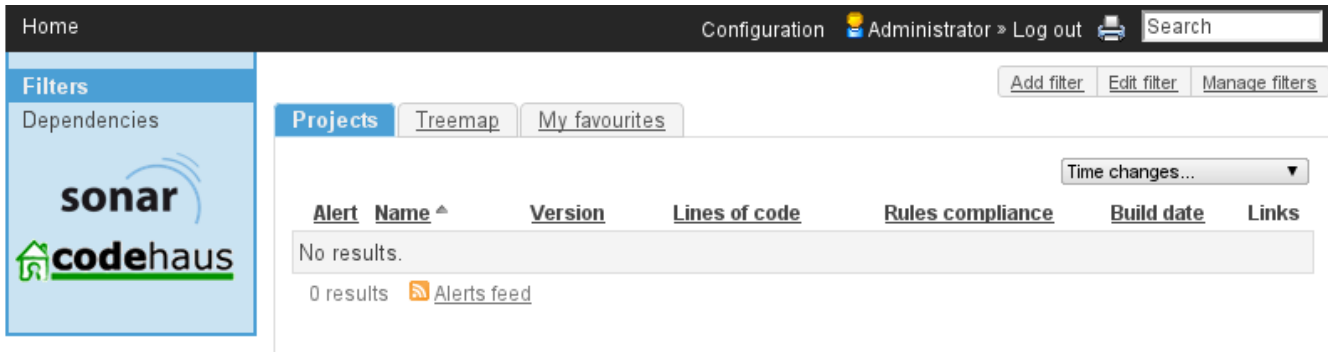

## Description / Features

The plugin allows you to add your own company logo to the SonarQubeUI. Two locations are supported. Here is the default TOP location:

The screenshot shows the SonarQube interface with the 'codehaus' logo prominently displayed in the top right area. The interface includes a navigation bar with 'Home', 'Configuration', 'Administrator', and 'Log out'. A search bar is also present. On the left, there is a 'Filters' sidebar with 'Dependencies' and 'sonar' logos. The main content area shows a 'Projects' table with columns for 'Alert', 'Name', 'Version', 'Lines of code', 'Rules compliance', 'Build date', and 'Links'. The table currently displays 'No results.' and '0 results' with an 'Alerts feed' link.

And here is the MENU location:

The screenshot shows the SonarQube interface with the 'codehaus' logo prominently displayed in the bottom left area, below the 'sonar' logo. The interface is identical to the previous screenshot, showing the navigation bar, search bar, filters sidebar, and the 'Projects' table with 'No results.' and '0 results'.

## Installation

1. Install the plugin through the [Marketplace](#) or download it into the `SONARQUBE_HOME/extensions/plugins` directory
2. Restart the SonarQube server

## Usage

1. Configure the branding settings in **Settings > General Settings > Branding**
2. Restart the SonarQube server (you have to restart the server each time you update the branding settings)
3. Admire your logo
