

Branding Plugin

⚠️ Deprecated

Deprecated since SonarQube 5.1 because the functionality was replaced by the native SonarQube feature [Look and Feel](#) functionality.

Description / Features

The plugin allows you to add your own company logo to the SonarQubeUI. Two locations are supported. Here is the default TOP location:

Home Configuration Administrator » Log out Search

Filters Dependencies

sonar

codehaus

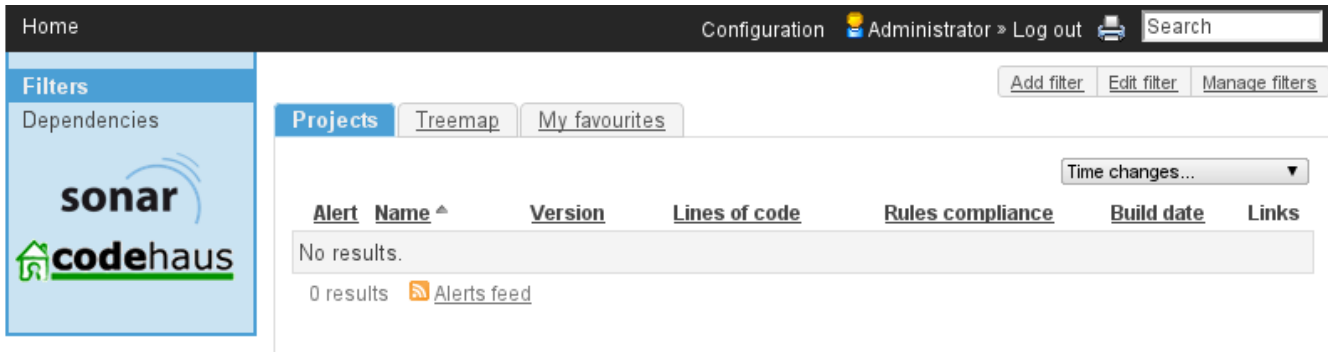

Add filter Edit filter Manage filters

Projects Treemap My favourites

Time changes...

Alert	Name ^	Version	Lines of code	Rules compliance	Build date	Links
No results.						
0 results Alerts feed						

And here is the MENU location:

Home Configuration Administrator » Log out Search

Filters Dependencies

sonar

codehaus

Add filter Edit filter Manage filters

Projects Treemap My favourites

Time changes...

Alert	Name ^	Version	Lines of code	Rules compliance	Build date	Links
No results.						
0 results Alerts feed						

Installation

1. Install the plugin through the [Marketplace](#) or download it into the `SONARQUBE_HOME/extensions/plugins` directory
2. Restart the SonarQube server

Usage

1. Configure the branding settings in **Settings > General Settings > Branding**
2. Restart the SonarQube server (you have to restart the server each time you update the branding settings)
3. Admire your logo
