

Branding Plugin

Deprecated

Deprecated since SonarQube 5.1 because the functionality was replaced by the native SonarQube feature [Look and Feel](#) functionality.

Description / Features

The plugin allows you to add your own company logo to the SonarQubeUI. Two locations are supported. Here is the default TOP location:

And here is the MENU location:

Installation

1. Install the plugin through the [Marketplace](#) or download it into the `SONARQUBE_HOME/extensions/plugins` directory
2. Restart the SonarQube server

Usage

1. Configure the branding settings in **Settings > General Settings > Branding**
2. Restart the SonarQube server (you have to restart the server each time you update the branding settings)
3. Admire your logo
