

Other Contributions

The following contributions are not SonarQube plugins but they add to the ecosystem.

Plugin	Description
AnthillPro	Supports configuring and launching SonarQube analysis from AnthillPro.
Atlasboard SonarQube Package	SonarSource's own wallboard widget, showing quality gate failures.
Atlasboard widget	An Atlassian Atlasboard widget to show selected metrics for a specific resource.
AzureAppService	Facilitate hosting SonarQube in an Azure App Service directly.
Convert Mocha reports to Generic Coverage format	<ul style="list-style-type: none">mocha-sonar-reportermocha-sonar-generic-test-coverage
Convert TRX to Generic Test Data format	An XSLT 3.0 transform to go from TRX to the Generic Test Data Format.
IIS Single Sign-on	An IIS plugin Custom Http Handler that allows single sign on for windows active directory users.
Karma SonarQube Unit Reporter	Converts Karma reports to Generic Test Data format.
Netbeans Radar plugin	Netbeans plugin to connect your local project to your SonarQube instance.
Oracle Forms PL/SQL Extractor	Extracts PL/SQL source code from Oracle Forms to feed SonarQube.
Puppet Recipe for SonarQube	A puppet recipe to install SonarQube.
Qualinsight Cobertura Maven plugin	Maven plugin that runs Cobertura instrumentation and reporting, and transforms the output to Generic Test Data format.
SecureCI	An open-source continuous integration solution that is packaged as a virtual machine and can be run with the VMware Player. It integrates many tools like SonarQube, Maven, Nexus, Hudson.
SonarQube Android Application	Provides access to your SonarQube instances from your Android devices.
SonarQube Open Social Gadgets	A suite of gadgets developed for GateIn that should also work in any other standard gadget container (JIRA4, Shindig).
SonarQube Scanner for JS	Makes it very easy to trigger SonarQube analyses on a JavaScript code base, without needing to install any specific tool or (Java) runtime.
TAP parser	Convert TAP test files to the Generic Test Data format.
TeamCity	The plugin provides a simple user interface for configuring a connection between TeamCity and SonarQube servers, and allows you to trigger analysis using the SonarQube Runner as a build step in TeamCity.
Visual Studio Extension	Alternative to SonarLint for Visual Studio for those using an old version of Visual Studio (older than Visual Studio 2015). Provides a comprehensive integration of SonarQube in Visual Studio for .Net projects. The objective of this integration is to remove the requirement that developers leave their favorite IDE to manage their source code quality
Walkmod Autofix	This is a walkmod plugin to automatically fix sonar rule violations.
