

Release 6.7.5 Upgrade Notes

Commercial Edition Must Be Upgraded

Because a new server identifier will be generated at upgrade to this version, **startup will fail** unless you upgrade your commercial edition to the latest compatible version.

SonarLint must be upgraded

Analyzers provided as part of a commercial package will be disabled in old versions of SonarLint. SonarLint users must upgrade to the latest available version:

- SonarLint for Eclipse: 3.3+.
- SonarLint for IntelliJ: 3.1+

Multi-version upgrade

Don't forget to read all the intermediate upgrade notes if you're upgrading more than a single version.
